

Goodsill Anderson Quinn & Stifel, one of Hawaii's preeminent law firms, seeks an experienced Network Administrator to join the firm's IT Team. Under the supervision of the Information Technology Manager and according to established policies and procedures, the Network Administrator is responsible for managing the installation, configuration, maintenance and support of firmwide network resources. The Network Administrator will also provide secondary systems administration support and tertiary end user support as needed.

Strong technical knowledge of networking, computer science, information technology, or programming as would normally be acquired through a Bachelor degree program with emphasis in a computer or technology related field. A *Cisco Certified Network Associate (CCNA)* or higher networking certification will suffice in lieu of education.

Seven years of progressively responsible work experience as a network administrator. Technical skills and ability to support a medium-sized hybrid LAN, consisting of physical, virtual, and M365/Azure cloud resources.

Strong working knowledge of Ethernet and WiFi networking. Cisco and Meraki platforms preferred. VMware and Citrix/VDI experience desired.

We provide a collegial and professional work environment. Salaries are commensurate with experience and qualifications. Competitive benefits include: Medical/dental insurance coverage, parking, vacation and sick leave, and 13 holidays per year.

On-site work. Must meet COVID Vaccination requirement.

Equal Employment Opportunity Employer; all inquiries will be handled in confidence.
